No responses yet for this question.

if Yes, which part did you like and why?

6 responses

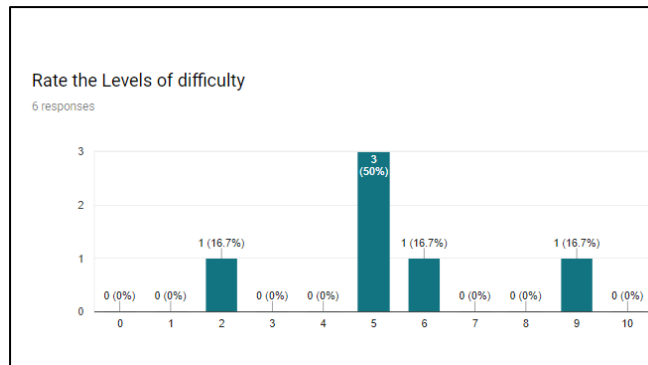

- I like the colors of the game because they match well and I like the background music.
- The art style is appealing.
- how the colour suits the game and how smooth thw gameplay is
- i like how the ball had a slight misty effect trailing behind it.
- The color scheme
- How there was two colours and a fences

was the music used made the game interesting...if no, why?(reload the page to listen to the music)

6 responses

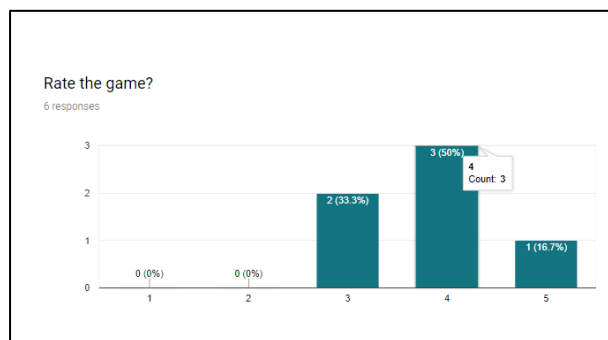

- I like the music chosen.
- Yes because it a very intense music to listen to on pong.
- i couldnt hear it
- couldnt here the music
- yes
- It was smooth

did the size of the ball & paddle made the game easier

6 responses

- No
- no the ball could be made smaller make it much difficult for the bot and the player to play.
- ye
- yes
- Yes
- Yes

can you suggest any improvment for the game? And why?

6 responses

- Make the game easier for players.
- Have some buttons that can change the game functions and the game bot and you.
- none the game is well made
- add a you win/lose once a maximum score is reached
- Change the ball speed and make it smaller
- Make the ball smaller

Task 2: Review test and make conclusions using feedback

Question	Answer
Have I added functionality to the app? What are the strengths and weaknesses of the additional functionality?	I have added music and a time The music work well as when the game start so does the music, but some people say that they can't hear the background music

What functionality did I improve? What are the strengths and weaknesses of this improvement?	That I have change the colours from black and white to red, blue, white and green. Most liked the colours I used, and I have improved the speed and the sizing of the ball and the paddles some thought it was easier and some didn't. some people think I should slow down the ball and some thought I should make the paddle and ball smaller.
What areas of the app could be further improved and why?	I would change the ball speed and the music. I would change the speed to start of slow then speed up a bit and I would try and make the music loops.
